DETAILED ACTION

1. Applicant's arguments see pg. 2, filed February 26, 2010, with respect to claims 1-2, 4-8, 10-15 and 17-23 have been fully considered and are persuasive. The rejections have been withdrawn.

Allowable Subject Matter

2. Claims 1-2, 4-8, 10-15 and 17-23 are allowed.
3. The following is an examiner's statement of reasons for allowance: Olry et al. (US 5,228,175), Chiu et al. (US 6,800,364), Kitamura et al. (US 5,030,435), and Tai et al. (US 5,994,261) have been determined to be the closest prior art of record.

As to independent claims 1 and 14, the combined prior art as set forth above fails to teach a woven isotropic pitch-based carbon fiber spun yarn fabric or a composite yarn comprising an isotropic pitch-based carbon fiber spun yarn wound with a first and second water-soluble polymer fiber. Specifically, Olry et al. fails to teach a carbon fiber spun yarn. Examiner notes that according to the Complete Textile Glossary of Celanese® Acetate, a spun yarn is a yarn consisting of staple fibers *usually* bound together by twist. (See pg. 150) Therefore, one of ordinary skill in the art would expect for a spun yarn to exhibit a twist. Olry et al. is explicit to yarns made *without* twist. Chui et al. and Kitamura et al. disclose isotropic pitch-based carbon fiber yarns but the references are silent as to a woven fabric made therefrom. Tai et al. teaches isotropic pitch-based carbon fibers however, the reference is also silent as to a woven fabric. Examiner notes that none of the above references teach a composite yarn comprising an isotropic pitch-

based carbon fiber spun yarn wound with a first and second water-soluble polymer fiber.

Claims 2, 4-6, 15, and 17-21 are dependent on claims 1 and 14; therefore they also contain allowable subject matter.

As to independent claims 7 and 22, examiner notes that the combined prior art fails to teach a method of manufacturing a woven isotropic pitch-based carbon fiber spun yarn fabric or a method of manufacturing a composite yarn comprising an isotropic pitch-based carbon fiber spun yarn wound with a first and second water-soluble polymer fiber for the same reasons set forth above. Claims 8, 10-13, and 23 are dependent on claims 7 and 22; therefore they also contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
